Northeast USA

Northeast USA

Business was on the upside for most companies in the northeast USA, according to the results of the 2005 Sage Software Business Minds Survey, with 63% of companies indicating revenues were up and 54% reporting increased profit. But flip the coin and you find the northeast USA also reporting the highest percentage of companies showing decreased *revenue* in the past year, with nearly a quarter in that position, and even more, 27%, reporting decreased *profits*, more than twice the North American average of 12%.

Business was on the upside for most companies in the northeast USA, according to the results of the 2005 Sage Software Business Minds Survey.

↑ 63%

Companies reporting increased revenues

↑ 54%

Companies reporting increased profits

↓ 27%

Companies reporting decreased profits
