Automate Time and Expense Tracking for Project-oriented Businesses

Sage TimeSheet is a project-oriented time and expense tracking solution—ideal for businesses that need to electronically track projects and collect data on the actual time spent and the expenses incurred on each task. Along with seamless integration with Project Accounting, Sage TimeSheet adds sophisticated time data collection to all major financial, project management and payroll systems.

Easy to install and administer, this comprehensive solution for internal or remote workgroups of any size helps track time and expenses by many user-defined levels, including employee, department, client, project, and individual task. Sage TimeSheet supports a robust approval mechanism that allows organizations to configure an approval process that matches their internal procedures and policies.

Plus, Sage TimeSheet is easily adaptable to any organization’s project structure and workflow.

For over a decade, thousands of organizations have relied on Sage TimeSheet (formerly Timesheet Professional) as their time tracking software to provide up-to-the-minute analysis on project budget costs, estimated time-to-completion and resources. By enhancing the Project Accounting solution with the capabilities of Sage TimeSheet, customers can improve billing cycles, increase cash flow, and streamline expense reimbursement by leveraging automated Accounts Receivable and Accounts Payable invoicing generation facilities.
Total Integration with Project Accounting
Seamless integration with Project Accounting helps your company:
- Establish a single entry point for resource, project, phase, and task information.
- Dynamically assign tasks to project teams.
- Leverage the automated billing and expense reimbursement facilities.
- Ensure that up-to-date project information flows to all team members.

User-Friendly Time and Expense Tracking
Take advantage of powerful time and expense tracking features that will help your company:
- Classify a virtually unlimited number of employees, clients, projects, phases, and tasks.
- Track each project’s details with notes.
- Define tasks with start and stop dates.
- Track tasks with Work Breakdown Structure (WBS) codes.
- Display tasks with Gantt bars.
- Summarize employee or task information with the roll-up feature.

Windows PC or Web-Based Interface
Both a PC and web-based timesheet interface means that you’ll have:
- Easy access to project assignments for onsite and remote team members anywhere in the world.
- Quick connectivity even when using multi-platform environments, since the Web browser interface supports both Windows and Macintosh workstations.
- Reduced numbers of desktop applications that your IT department supports by using the Web-browser module.
- Less time spent on administrative tasks by automating daily or recurring tasks associated with employees, tasks, and data.

Time-Saving Workflow Approval Process
User configurable approval steps enhance the workflow by:
- Allowing for multiple approval steps based on company procedures and policies.
- Notifying managers and employees through e-mail that specified levels in the approval process have been met.
- Providing a single entry point for reviewing and approving timesheets and expense claims across project teams.

Comprehensive Reporting for More Accurate Project Analysis
Robust reporting tools in Sage TimeSheet improve your company’s analytic capabilities and allow you to:
- Run reports in the Sage TimeSheet Web-browser module for easy export to other applications for further analysis and review.
- Utilize summary reports, including an easy-to-use wizard that walks you through the report creation process.
- Create PDFs of reports for distribution by e-mail and Web browser.
- Forecast resources and compare costs quickly and easily.
- Analyze resource utilization across projects.

Fully Customizable to Meet Unique Project Tracking Needs
Meet and exceed your company’s unique project tracking needs with a solution that:
- Expands for virtually unlimited employee capacity.
- Maintains names, groups, dependency rules, security profiles, and pay rules.
- Allows for customized terminology.
- Defines custom security profiles for entering time and adding tasks.
- Modifies specific tasks and component fields rather than overwriting an entire record.
- Allows for up to 10 custom fields to track data for each phase or task.

“With Sage TimeSheet we’ve seen a solid ROI from a management effectiveness standpoint, as well as in real dollars. Not counting the additional revenue we’re receiving from previously unbilled sources; we’ve seen a more than 13 percent increase in our returns from outside clients over last year.”
